The amenities of this multi-functional, international standard are in proximity with a separate entrance, floors that can be locked down and divided to form a sanitized biosphere for a team or group with strict entry standards and limited movement outside of its cordon.

This entails regular testing of all those within Bubble, strict criteria for leaving and entering, a controlled environment, social distancing, strict sanitizing and health protocols.

The Dome Namibia Presents Our Bio-Bubble For Your Sport Focus

The amenities of this multi-functional, international standard are in proximity with a separate entrance, floors that can be locked down and divided to form a sanitized biosphere for a team or group with strict entry standards and limited movement outside of its cordon.

All members of the Bubble are tested for COVID-19 before entering the Bubble.

They are quarantined and allowed access to (only) the Bubble demarcated areas and are not allowed to interact with people outside the Bubble, not even during traveling.

The most important prevention rule is to respect social distancing. Protocols will build the privacy imperative into the stay. The room will become a private place and staff will only enter it at the request of the customer and at times indicated by them.

This entails regular testing of all those within Bubble, strict criteria for leaving and entering, a controlled environment, social distancing, strict sanitizing and health protocols.

The Dome Bio-Bubble has a sanitary protocol certification as proof of compliance with the WHO COVID-19 protective measures.

World Class Services and Facilities

The Dome Namibia offers first class restaurants, amenities, and our hotel staff is dedicated to your specialised sport needs.

Our Great Services

A controlled environment which is sealed off from the outside world. In the case of sport, the movement of athletes, coaching and support staff are limited to the Bubble, thus cutting down their physical interaction with the outside world, minimising the risk of contracting the infection.
